Education

The University of Hong Kong

Bachelor of Arts and Science in Applied Artificial Intelligence (BASc(AppliedAI))

Sep 2023 – Jul 2027 (Expected)

- **CGPA:** 3.62/4.30 (Expected First Class Honors) **Second Major:** Computer Science
- **Awards:** Dean's Honor List (2025-26), Endeavour Merit Award (2024-25, 2025-26)

Professional Experience

FWD Group Management Holdings Limited

Summer Intern, Finance Cloud Infrastructure and Operations Team, Group Technology Services

Jun 2026 – Current

Radio Television Hong Kong (RTHK)

Summer Intern, Engineering Section (Broadcast Systems), Production Services Division

Jun 2025 – Aug 2025

- Researched correction of Cantonese subtitle transcription errors with Jyutping and LLM based methods.
- Developed video post-processing tool with AI visual features using **MediaPipe** for a visitor workshop; enabled a one-button automated workflow to record, save, add effects, and playback, generating hundreds of unique showcase videos.
- Skills: Automatic Speech Recognition (ASR), Motion Capture, Model Fine-Tuning, Computer Vision

InspireLab Limited

Summer Intern

May 2024 – Aug 2024

- Engineered a **RISC-V** microcontroller STEM toolkit, integrating 5+ open-source libraries and controlling over **64+ I/O components**.
- Skills: Embedded Software Programming, RISC-V, Assembly Code, C/C++ Build System

Project Experience

Nocodile AI (Student Interest Group, AI Education Initiative)

Feb 2026 – Current

- Developing backend automated scalable AI training infrastructure on Azure Container Apps with A100 Serverless GPU.
- Skills: Azure Container Apps, Serverless GPU Inference, Object Detection

30-Day All-Cause Hospital Readmission Prediction with MIMIC-IV (Group Project)

Oct 2025 – Dec 2025

- Applied **advanced machine learning techniques** (Stacked Generalization, Automatic Machine Learning, ModernBERT LoRA fine-tuning), achieving **10% improvement** in AUROC over baseline models.
- Identified and reported **future data leakage** in the dataset that inflated AUROC to 0.95, demonstrated how such flaws lead to over-optimistic models that fail in clinical production.
- Skills: Advanced Machine Learning, Data Leakage, Data Analysis and Visualization, Storytelling, Model Fine-Tuning, Feature Engineering

alphahku.page

July 2025 – Aug 2025

- Developed a static website for a student organization using **Next.js**, shadcn/ui, Tailwind CSS, and deployed on Vercel.
- Skills: Next.js, Tailwind CSS, Frontend Design, Vercel, SEO, User Experience (UX)

Reproducing RealFill (a research paper on SIGGRAPH 2024)

Mar 2025 – May 2025

- Implemented and benchmarked a custom two-stage process on original RealFill pipeline, based on LoFTR keypoint matching, improving generation authenticity by filtering output samples and treat them as pseudo-ground truth.
- Skills: Research Paper Reproduction, Benchmark Automation, Image Generation and Inpainting, Synthetic Data

Stock Market Simulator (Group Project)

Apr 2024

- Led a team of 5 in **oversighting Software Development Life Cycle** for a C++ terminal-based game course project.
- **Reduced time-to-market and developer friction** by implementing CI/CD pipelines on 3 platforms using GitHub Actions, automating compilation and code checks for all pull requests.
- Skills: CI/CD, GitHub Actions, C/C++ programming, Build Systems (CMake, Makefile), Cross-platform Development

PyInstaller (Open Source Development)

Jul 2021 – Nov 2021

- Skills: Git, GitHub, Open-source Development, Python Packaging

Misc

Languages: Native Cantonese, Fluent Mandarin and English

Interests: Computer Vision, Model Deployment, Computer Networks and Security, Cloud Computing, Agentic Workflow Automation

Courses: Algorithm Design and Analysis (A), Computer Networks (A+), Deep Learning (A+), CUDA Programming (A+), AI Agents (A+), Web Development (A+), Python (A+)
